Countdown timer is a software to help you set a countdown timer for a certain task or project. You can use it to notify you before an event of your life, for example, some events will end in a few days, weeks or months, you need to plan your study or job ahead, or you need to organize your party, you can choose a time for your meeting or party in advance and you can remind yourself, maybe you have a project to do, and countdown timer can help you count down with your favorite music.

1. Start the Countdown Timer and Set a Time, you can: Countdown timer lets you set a timer. You can set a countdown timer to a certain time, and then the countdown timer can show the time that is left until the target time. And countdown timer not only shows the time that is left until the target time, it can also announce it by sound or message. In Me Countdown, you can choose to either set a time from the time left until now, or a time from the time left until target time. The timer will be counted down when you set the time left until target time, and it will be counted up when you set the time left until now. The time left until target time is displayed at the bottom of the timer. You can click the button “reset to current” to reset the time to the time left until now.
2. Set the Countdown Timer to Pause, or to Stop. You can set the countdown timer to pause or stop, after you set it to pause, the countdown timer will stop counting down, and it will show you the time left until target time when you click the button “start counting”. After you set it to stop, the countdown timer will show you the time left until target time, but it will not count down, and it will not announce any alarm when you click the button “start counting”.
3. Set the Countdown Timer to Play or Stop the Countdown Timer. You can set the countdown timer to play or stop. When the countdown timer is playing, it will continue counting down and it will announce the time left until target time. When the countdown timer is not playing, it will stop counting down and will show the time left until target time when you click the button “start counting”.
4. Turn on or Turn Off the Countdown Timer

What's New In?

Me Countdown is a lightweight software application built specifically for helping you use a countdown timer. It sports a clean and intuitive layout that offers quick access to several configuration settings to tinker with. Although it doesn't feature a help manual, even rookies can master the entire process with minimum effort, thanks to its well-organized functions. Me Countdown gives you the possibility to specify the time (hours, minutes, and seconds), play, pause, or stop the countdown timer, as well as reset the information with just one click. What's more, you can enable a second countdown timer, and customize its layout in terms of opacity, background color, font, font style, size, and color. Additionally, you are allowed to embed borders for the second countdown timer, and make it stay on top of other utilities. One of the top features bundled in this tool is smart system which manages to generate sound notifications and messages when the time is up. Plus, you are allowed to select between different preset alarms, but it is not possible to upload your own audio files from the computer. Since there aren't many configuration settings, even rookies can master the entire process with minimum effort. During our testing we have noticed that Me

CountDown provides very good image quality, carries out a task quickly, and no errors showed up throughout the entire process. It doesn't eat up CPU and memory, so the overall performance of the computer is not hampered. All things considered, Me CountDown offers an intuitive layout and a handy set of parameters for helping you set a countdown timer for a certain task or project. User Interface Rating: 3.5 If the purpose of your decision to download this program is simply to use a countdown timer, you are better off looking elsewhere. This tool is meant for people who enjoy a more involved environment where they can mess around with settings in order to configure the program. CountdownTimer for Mac 10 Determine if you have the correct number of days, hours, minutes, and seconds remaining for your task or project. Our countdown timer for Mac is great for people who enjoy having a variety of options to change their countdown timer on the fly. Me CountDown is a lightweight software application built specifically for helping you use a countdown timer.
