What's New In?

Arrow – Snap to Arrow (line) (1:44 min.) Dynamically change the default orientation of a series of lines by using a pointer or other shape to align and generate arrows (video: 1:26 min.) Three new markup assist features, Select Locators, Print Preview, and

Markup Assist, are included in the default Windows 10 Start Menu: Start Select Locators: Quickly move the cursor to a specific location, no matter how many objects are in the way, and see what's there (video: 4:26 min.) Start Print Preview: View your design on a new sheet of paper and make changes in the View tab with no additional steps (video: 1:44 min.) Start Markup Assist: Add and revise a label in one click, no matter how many objects are in the way. Quickly access symbols and functions and add them to your design in one step (video: 1:26 min.) Raster Image and Vector Shape Tools The Vector Shape Tools – Rectangle, Line, Circle, Ellipse, and Polyline – now support drawing all these shapes by using a full mouse or tablet, and the selection handles are scaled by the current scaling factor. In the new Raster Image Tools, the Image Mover tool now has an option to automatically move objects after scaling. You can draw a single copy of an object to move, or multiple objects to move simultaneously. Draw a range of objects, such as stars or planets, and then move and rotate them to a desired position. This allows you to make your own constellation, for example, and then easily create your own star maps. The Filter tool also supports new rasterization filters. Lighting When you add a light source, light automatically streams into nearby objects, making it easier to determine whether shadows should be shown. The new Hidden option in the Shadows dialog box makes it possible to turn off shadows on layers that do not appear in the scene. You can also view lighting effects on the Lighting tab of the Render Settings dialog box. The Lighting tab now has six user-defined lighting types, which can be compared to the X-ray, Sunburst, Sharp, Soft, and Flat options. Newly added Lighting configurations include Dotted, Dim, and Specular. You can use the Dashed, Linear, and Dot Line types to add
