■ AutoTypewriter is a free, lightweight, easy-to-use application that can be launched by a hotkey. You can configure the hotkey of AutoTypewriter to allow you to switch among different applications with ease. ■ Auto Typewriter can record an unlimited number of typed text data. Besides, the recorded data can be saved as a txt file or imported into Microsoft Word or other editors. ■ When in Free version, typing speed is at least 1 character per second. The speed of Auto Typewriter can be improved to 5 characters per second. ■ Auto Typewriter supports both a hotkey and schedule function. You can configure the hotkey and the schedule independently, and the free version allows you to set up 20 hotkeys and 1 schedule. ■ Auto Typewriter can support Windows 7, Vista, XP and 2000. ■ Auto Typewriter offers a password to protect the saved data. The password is optional. ■ Auto Typewriter can import a keyword file and generate automatically the key commands for each keyword. You can also edit the existing key commands to enrich the hotkey. ■ Auto Typewriter can work with document files or images, just like other editors, such as Word. You can directly open a document file in Auto Typewriter, and change the format as you like. ■ Auto Typewriter is used for all kinds of tasks, such as record text, register new data, save text, email text, and import text from MS Outlook. ■ Auto Typewriter supports all key commands for Microsoft Word, and it is compatible with key commands for Microsoft Excel, PowerPoint, etc. ■ Auto Typewriter contains many features, and you can improve these features based on your requirement. ■ The soft keyboard will display the selected hotkey when you have it on the soft keyboard. ■ The hotkey can be assigned to a key, an accelerator key, or a combination of keys (such as Ctrl+Alt+Shift). And the hotkey combination can be recorded repeatedly (such as Ctrl+Alt+Shift+Shift+Alt+Shift+Shift+Alt+Shift+Shift). ■ To enable the hotkey, all you have to do is specify the hotkey on the Edit -> Window -> Hotkey panel, and click the Add hotkey button. ■ To disable a hotkey, you only need to drag it off from the Hotkey panel. ■ You can import many files to Auto b7e8fdf5c8

FileShare Remove files and folders after they are removed from the recycle bin. Files retained in the recycle bin can be recovered in the event of accidental deletion. The program can find trash and cache files, temporary Internet files, cookies, saved passwords, automatic download files, recent documents and so on. A folder can be shared with other users or a group. The "Trash"/"Recycle"/"Cookie"/"Temp. Internet" file name for the Trash folder and the Cookie folder is different. Recover deleted data files with the help of a super data recovery tool. It is possible to restore data from internal or external hard drive through this data recovery program. You can also get your data files back from formatted computer hard disk with the help of latest technology. As its name suggests, DataManAGe is a powerful tool that makes it possible to recover deleted files quickly. It also offers the possibility to recover files that have been securely deleted, which the program claims are very safe to retain. This quick and easy-to-use data recovery tool enables users to recover deleted files for all supported file systems, including NTFS, FAT32 and exFAT, MacOS, UFS, DFS, FFS, HFS, ZFS, and ext2, ext3, ext4, eCryptfs, NTFS5 (logical volume management) and BTRFS. Windows 8 will probably be here before you know it. So what does this mean for your desktop or laptop? You are about to see a huge change in the way computer users think. One of the most serious changes will be the introduction of multi-touch. Many of us have experienced Windows 8 on a touchscreen computer, but this version will have an even better user experience, thanks to the added touch functionality. It will allow you to use drag and drop, long-pressed mouse clicking, as well as many other features that can be found on an iPad and other mobile operating systems. Multi-touch technology is part of the next-generation of Windows 8. It is the touch interface with additional windows that is available with its Microsoft Surface computer. All touch screen computers will have it enabled, and it will be easy to switch between it and the mouse and keyboard. An upgrade to your old desktop computer is probably not a great idea, as most of the people who have changed their computers find they do not want the windows 8 features. It will probably
