===== Hello everyone, Producer and Director at R'CSOFT, here's yuta from R'CSOFT. The character design for the game and the development of the game itself is much thanks to our team's dedicated and extremely skilled artist, pahibi, who really helped me keep a steady view of the whole picture. — Yuta: The protagonist in the game, in the Lands Between, is the Tarnished King "Ti'el" who is originally from Elfath. But it's rumored that the actual protagonist is the Grahf, Lord of the Elden Ring Cracked Accounts, so it will be interesting to see whether or not this rumor turns out to be true. — Tough and an absolute man, Ti'el is a kind of "father" figure to many people. If you say so, it may be because he looks exactly like an old man. Although he is firmly controlled and has absolutely no compassion for others, he still cares deeply about his subjects and people. He has the responsibility of continuing the life of those on the brink of death, who were allowed to live until that point, and protecting the ones who are still alive. — Yuta: I hope that the players will find something interesting in this game, and if you do, please tell us! — The dream is that the players can experience with their own hands the exciting and bff6bb2d33

In addition to the basic sword combat of RPG games, this game involves various activities including dungeon crawling and battle. Moreover, the game aims to create a connection between players by linking the way they connect, such as leaving a message, and also connect between players via statistics. Battle (Play Style): Take on the role of a hero of bravery and strength to become a new Naga hero and fight against other warriors. At the same time, the game features a new system where players can choose the type of sword they wish to use. If you use a traditional sword with a limited reach, you can freely attack enemies. If you use a long-range sword, you will be more confident in fighting. If you use a magic sword, you will be able to use spells in battle. The traditional RPG battle has also been completely redesigned. The front side of the screen acts as a view of the surrounding area, while the opposite side acts as the typical battle view of other games. With this system, it is possible to have a battle view without being blocked by the screen, and the game feels more immersive. The new battle system also aims to change the way players connect during battle. In the game, if the player becomes injured while attacking or being attacked, they are removed from battle and can then leave their party to rest, sleep, or heal. Players can transfer their characters to other players who have not yet finished their own story. Dungeon Crawling: Explore the Lands Between and collect items using your own "talent." In addition to the RPG battle, there is an activity called "dungeon crawling." The game features a technology called "Area of Influence" (AoI). By increasing your level, you can increase the range of your AoI. As your AoI increases, you can freely explore areas that are not accessible as a result of the level you are playing at, and you can even save your game even when you are in a dangerous situation. Another major feature of the game is the Battle Reactor system, through which the characters gain energy by killing monsters. The more powerful your characters are, the more difficult monsters will be. This system also has an important function in the fact that if you prepare for battle, the energy from the battle will be saved. Social Networking: Meet and communicate with other players to share stories. In addition to meeting with other players
