With recent attempts like Rabbids Land lacking the imagination and originality needed to be truly great open world titles. The popularity of open world games over the last few years has led to studios producing a variety of them, this often leads to great games being developed that are a bit on the safe side and require you to spend time doing activities such as golfing or shopping. The new Assassin's Creed game is a great example of this. Despite some fantastic feats of storytelling and a rousing soundtrack they sadly lack some of the imagination required for a truly amazing game, with little in the way of new concepts or gameplay elements the game was little more than a new way of doing things. The new open world game looks like it will hopefully rise above this sort of company and take it to greater heights. Making use of the environments with a new questing system, engaging open world exploration, and new ways of interacting with the world, we can expect to be entering into some truly spectacular open world gaming.
