
Mojoworld 3.1 Professionnel ^NEW^

Download

the biggest change in mojomworld 3.1 is the new mojograph application. the old mojograph allowed you to create new materials, but not new effects. if you wanted to change the lighting of a terrain, you had to make a new terrain, but in the old mojograph, the only effect you could change was the color of the terrain. mojograph is just a tool that lets you edit everything in mojomworld. it's easy to get lost in mojograph. i could spend days trying to figure out how to do something in mojograph, and i have. there is a lot of information in mojograph, and it can be overwhelming. i hope this message finds the both of you well. the only reason i made an account on this site was to speak to both of you. i posted specifically on this thread because i wanted to talk to the two of you about mojomworld and being new here i have to post ten times before i can use the pm feature here. please respond to me asap. if you can please reach me at dsmccurdy at hotmail dot com and put mojo in the thread. hi, i was wondering if you could help me, i have just purchased the mojomworld 3 pro version and i love the program, i have made a small game with it and put it on a website and when i take the code off the website and put it on my computer, it is in total disarray. so could you please tell me where i can get the mojomworld 3 pro program, i have tried to download it off the mojo.org website, but i can't get past the registration page, i have tried everything i can think of, is it only the usa that can download it? thanks. mark

Mojoworld 3.1 Professionnel
